PLEASE READ AND SAVE THESE INSTRUCTIONS

IMPORTANT INSTRUCTIONS

PLEASE READ AND SAVE THESE IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

1. Read all instructions before using this heater.
2. This heater is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. If provided, use handles when moving this heater. Keep combustible materials, such as furniture, pillows, bedding, papers, clothes, and curtains at least 3 feet (0.9m) from the front of the heater and keep them away from the sides and rear.
3. Extreme caution is necessary when any heater is used by or near children or invalids and whenever the heater is left operating and unattended.
4. Always unplug heater when not in use.
5. Do not operate any heater with a damaged cord or plug or after the heater malfunctions, has been dropped or damaged in any manner. Discard heater or return heater to authorized service facility for examination, electrical or mechanical adjustment, or repair.
6. Do not use outdoors.
7. This heater is not intended for use in bathrooms, laundry areas and similar indoor locations. Never locate heater where it may fall into bathtub or other water container.
8. Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Do not route cord under furniture or appliances. Arrange cord away from traffic area and where it will not be tripped over.
9. To disconnect heater, first turn controls to off, then remove plug from outlet.
10. Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the heater.
11. To prevent a possible fire, do not block air intakes or exhaust in any manner. Do not use on soft surfaces, like a bed, where openings may become blocked.
12. A heater has hot and arcing or sparking parts inside. Do not use it in the areas where gasoline, paint, or flammable liquids are used or stored.
13. Use this heater only as described in this manual. Any other use not recommended by the manufacture may cause fire, electric shock, or injury to persons.
14. CAUTION: Always plug heaters directly into a wall outlet/receptacle. Never use with an extension cord or relocatable power tap (out/power strip).
15. This heater draws 12.5 amps during operation. To prevent overloading a circuit, do not plug the heater into a circuit that already has other appliances working.
16. It is normal for the plug to feel warm to the touch. However, a loose fit between the AC outlet (receptacle) and plug may cause overheating and distortion of the plug. Contact a qualified electrician to replace loose or worn outlet.
17. The output of this heater may vary and its temperature may become intense enough to burn exposed skin. Use of this heater is not recommended for persons with reduced sensitivity to heat or an inability to react to avoid burns.
18. Don't leave the heater on unattended.
19. **“SAVE THESE INSTRUCTIONS”**

OPERATION INSTRUCTIONS

IMPORTANT!

Your heater is equipped with a polarized alternating current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your outlet. **DO NOT** defeat the safety purpose of the polarized plug.

Control Panel Functions

A Control Panel

C Base

 Temperature setting

L Low heating speed

B Air Outlet Grill

 Power button

H High heating speed

 Energy saving mode

1. Check that neither the appliance nor the power cable has been damaged in any way during transportation when first using.
2. Place the heater on a firm level surface that is free of obstructions, and at least 3' (0.9 m) away from all walls and other objects such as furniture, curtains, plants or combustible material.
3. Plug the heater into a grounded 120 V AC, 60 Hz source.
IMPORTANT: Your heater is equipped with a polarized alternating current line

plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your outlet. DO NOT alter the safety features of the polarized plug.

4. Heat setting

Press the  button to cycle through the functions: H, L,  energy saving heat mode and "OFF".

The functions for this button include:

- a) Turn the unit on;
- b) L MODE: The heating elements operate at 900 W.
- c) H MODE: The heating elements operate at 1500 W.
- d)  ENERGY SAVING MODE: The heater will automatically select the appropriate power level to best accommodate your desired temperature. As the air temperature in the room approaches the set temperature, the heater will automatically lower the power consumption and provide consistent warmth without wasting energy.
- e) Turn the unit off.

5. Temperature setting (65°F - 85°F)

When the heater is in operation, press the  button to set your desired temperature. There are five distinct settings: 65°F, 70°F, 75°F, 80°F, 85°F

SAFETY FEATURES

Thermal Cut-Off: This heater includes a Thermal Cut-Off Overheat Protection System that shuts the heater off if it overheats due to abnormal conditions. If this occurs, turn the heater "OFF", unplug it, and inspect and remove any objects on or adjacent to the heater. Allow it to cool for a few minutes, plug it back in, and resume normal operation.

Thermal Fuse: When the unit reaches extremely high temperatures, the heater's fuse will shut off permanently. Should this occur, bring the heater to a certified electrician for examination.

TROUBLE SHOOTING

If your heater fails to operate, please follow these instructions:

- Ensure that your circuit breaker or fuse is working properly.
- Be sure the heater is plugged in and that the electrical outlet is working properly.
- Check for any obstruction. If you find any obstruction, turn the heater "**OFF**". Unplug the heater and wait a few minutes for it to cool down. Carefully remove the obstruction. Plug the heater in and turn it on again by referring to the **OPERATING INSTRUCTIONS**.

CLEANING AND STORAGE

It is recommended that the heater be cleaned at least one time during the operating season in order to provide the optimum level of performance.

ALWAYS TURN THE POWER SWITCH OFF AND UNPLUG THE HEATER BEFORE CLEANING.

Be sure to save the box for off-season storage.

- Turn the heater “ OFF”,unplug it and wait for the heater to cool down.
- Use a dry cloth to clean only external surfaces of the heater.
- Do not use any cleaning agents or detergents.
- Never immerse the heater in water.
- Pack the heater in the original carton and store it in a cool and dry place.
